

IN THE CLAIMS:

Please cancel Claims 1 and 3 to 6 without prejudice to or waiver of the subject matter contained therein.

Please amend Claim 7 as follows. All claims in the application are being reproduced below in accordance with current U.S. Patent and Trademark Office requirements.

Claims 1 to 6 (Cancelled).

7. (Currently Amended) A projection display apparatus, comprising:

a display panel comprising a rectangular substrate having four sides including first and second pairs of opposite sides, and a plurality of electrodes disposed along only the first pair of opposite sides;

a circuit board provided with a drive circuit for driving said display panel;

a projection lens support provided with a projection lens for projecting an enlarged image onto a screen;

a holder for holding said display panel and provided with positioning means for positioning said holder and said projection lens support, wherein

said projection lens support is positionally aligned and connected with said display panel via said holder by said positioning means, and wherein said display panel, ~~and said projection lens support are integrally fixed on said circuit board by a fixing screw, and~~

~~further comprising shift registers disposed along said four sides, and converters for converting digital signals to analog signals, said converters being disposed along~~

~~opposite two sides of said substrate~~ said projection lens support, and said circuit board are integrally fixed by fixing screws, and said plurality of electrodes and said circuit board are electrically connected by said fixing screws.

Please add Claim 8 as follows:

--8. (New) An apparatus according to Claim 7, wherein said display panel further comprises shift registers disposed along said four sides, and converters for converting digital signals to analog signals, said converters being disposed along opposite two sides of said substrate.--
